How to:

STEP 1

Place your coin on a flat surface.

STEP 2

Lay the sheet of paper on top of the coin where you want the impression of the coin to be.

STEP 3

Hold the paper down firmly. Make sure you hold the coin still, if the coin moves while you are rubbing, the rubbed impression will be blurred.

STEP 4

Using your crayon or pencil begin gently rubbing back and forth across the surface of the coin until an impression of the coin begins to appear. Be careful not to rub too hard.

STEP 5

Continue rubbing until the whole coin is showing up on the paper. Repeat with the other side of the coin.
