- 12771 -
- 10897 - Student Scissors - Pack of 20
- 13652 - CleverPatch Cover Paper Assorted - A4 - Pack of 275

How to:

STEP 1

Begin by decorating one large and two smaller cardboard rolls using felt. Wrap the felt around the cardboard rolls and attach with glue. Trim any excess felt. Allow to dry.

STEP 2

Glue the three cardboard rolls together with the largest in the centre. You may need to wrap a rubber band around them while the glue dries to help it hold.

STEP 3

Decorate the middle cardboard roll with CleverGlitz™ to create windows for your rocket. Allow to dry.

STEP 4

Cut out a triangle from cover paper to decorate the top of your middle cardboard roll. This will create the shape of your rocket. Attach with glue.

STEP 5

Place the cardboard rolls on top of a piece of orange cover paper and draw some flame shapes around the base. Carefully cut them out and place them on a piece of red cover paper. Trace around the orange flames to create slightly larger red flames and cut them out.

STEP 6

Glue the two flame shapes together and attach to the base of your rocket. Attach with glue.
