Materials:

12437 - Paper Magiclay - Coloured - 240g Pack

18217 -

How to:

STEP 1

Sketch out your animal onto a piece of paper. This is not essential, but helps with planning your design. Look to our animals for inspiration or come up with your own.

STEP 2

Begin by breaking off some pieces of coloured clay to mix the colours you require.

TIP

Once the colours have blended together completely, there should be no more coloured ripples in the clay.

STEP 3

Simply knead the two colours of your choice together until they form a smooth singular colour.

STEP 4

To make your animal's body roll the clay into a ball. Roll a smaller ball to create your animal's head.

STEP 5

Break off smaller pieces of clay to mould features such as ears, eyes, a mouth and a nose.

STEP 6

To join the clay, softly push your pieces together. Allow to dry.

STEP 7

You might like to add further detail by pressing a modelling tool into the clay.

TIP

Rotate the clay as it dries to make sure it gets air on every part of the surface and dries completely.

STEP 8

Leave your clay creations to dry for a minimum of 24 hours.
