18229 - Plastic Dinosaur Skeletons - Pack of 12

16523 - CleverPatch Triangular Maxi Coloured Markers - Pack of 10

18098 - Plastic Tools - Pack of 20

How to:

STEP 1

Using a pencil, draw a design onto your egg canister. Use a marker to colour in your design. These can be decorated in a number of ways. Use the steps above as a decorative guide and mix up the techniques to create a unique combination of your own!

STEP 2

Mix 1 part calcium carbonate with 1 part water in a bowl and stir well until it forms a smooth thick consistency

STEP 3

Pour the mixture into one half of the egg canister until it is around $\frac{3}{4}$ full. Then place in your dinosaur skeleton.

STEP 4

Pour the remainder of your mixture over the top of the dinosaur until it is completely covered. Allow to dry.

STEP 5

Allow to dry for 24 to 48 hours before placing the lid on top. Once the mixture is set you can start digging to find your dinosaur skeleton!
