- 17630 - Faber-Castell Classic Colour Pencils - Pack of 72
- 18765 - Hole Punch - Each
- 18864 - Chain Nose Pliers - Each

How to:

STEP 1

Print out the template provided. You could also make your own sketches of other famous Australian snacks that you love to eat!

STEP 2

Place the template under a sheet of shrink plastic film, making sure the shiny side is facing down. Use pencils to trace over your favourite snacks from the template. Once complete, carefully cut the snacks out and punch a hole in the top of each one. Adult supervision is recommended when using scissors.

STEP 3

Bake the shrink film following the instructions included in the pack. Once cooled, loop a jump ring through the hole in each of the snacks and use pliers to close shut. Your charms are ready to thread onto a bracelet!

STEP 4

Cut a length of waxed thread long enough to fit comfortably around your wrist. Use a pair of pliers to carefully press a leather end onto one of the ends.

STEP 5

Thread coloured beads and your charms onto the length of waxed thread. You may need more or less beads depending on the length. Once you've reached the end, use the pliers to press a leather end onto the end, holding the beads and charms in place.

STEP 6

Use a jump ring to attach a jewellery clasp to one of the leather ends. Add a single jump ring to the other leather end and your bracelet can now be safely fastened for wearing!
