

# Smoke Alarm Maintenance Guide

Use this calendar to help keep track of when to maintain your smoke alarm.

## Every month

Test your smoke alarm batteries every month by pressing and holding the test button for at least five seconds until you hear the beeps.

## Every 6 months

Vacuum dust off your smoke alarms every six months.

Keeping your smoke alarm free of particles helps reduce false alarms and ensures smoke can easily reach the internal sensor.

## Every year

Replace lead or alkaline batteries every 12 months.
