

# Cardboard Alpacas

Use the below template to number your pieces before popping them out.

Pop out the pieces. You may wish to trim the tabs from the edges of the cardboard. Adult supervision is recommended when using scissors.

Glue the number 1 pieces together.

Glue the number 2 pieces on either side of the number 1's, making sure they are aligned.

Repeat the process and glue the number 3 pieces to either side of the number 2's, making sure they are aligned. You will now have an alpaca shape that can stand up.

Create two stacks with the remaining pieces. Start with a number 4, then glue a number 5 on top and finally a number 6 on top of this. Glue a stack to each side of the alpaca, thus rounding out his belly. Allow to dry.

Your Alpaca is now ready to decorate however you wish!
